Thanks for the feedback. To help us troubleshoot this issue further, we will need more information. Please share detailed reproduction steps and as much as possible of the following information when it applies if you haven't already:

1. Android Studio version and OS type and version

2. Screenshots or videos of the issue

3. idea.log file (select Help > Show Log in Finder / Explorer)

4. Thread dumps if the issue is a freezing or non-responding UI.

For more information on what's needed and how to obtain this information please read the guide at <https://developer.android.com/studio/report-bugs#studio-bugs>

My build.gradle already set sourceSets :

```
sourceSets {  
    main {  
        java {  
            include '**/*.java'  
            include '**/*.kt'  
        }  
        java.srcDirs = ['src/main/java']  
        jni.srcDirs = ['src/main/jni']  
    }  
}
```

but remind me  
this .java file is outside of java source roots and won't be added to the classpath

*Reassigned to je...@google.com.*

where is this FileLog.java located ?

**zj...@gmail.com** <zj...@gmail.com> [#6](#)

Dec 8, 2020 06:11PM ⋮

the path is src ->main ->java ->tv ->athena ->klog ->hide ->writer, please check the snapshot:

*Status: Won't Fix (Obsolete)*

Hi, 'src/main/java' is the default directory and does not need to be explicitly specified. If you have a project where this can be repro'd please reopen this bug and we can take a look.
