Edit

DESCRIPTION hr...@gmail.com created issue #1

Build: AI-202.7660.26.42.7351085, 202105101744,

AI-202.7660.26.42.7351085, JRE 11.0.8+10-b944.6842174x64 JetBrains s.r.o, OS Windows 10(amd64) v10.0 , screens 1536x1728, 1536x1728

AS: 4.2.1; Kotlin plugin: 202-1.5.10-release-894-AS8194.7; Android Gradle Plugin: 4.2.1; Gradle: 6.7.1; NDK: from local.properties: (not specified), latest from SDK: (not found); LLDB: pinned revisi

IMPORTANT: Please read <https://developer.android.com/studio/report-bugs.html> carefully and supply all required information.

Describe the exact steps to reproduce:

1. In Android Studio, create a new Navigation Drawer Activity Project with language Java. Keep the default Minimum SDK 16 and unchecked legacy support libraries options.

in MainActivity.java, check for strictmode policy violations by inserting the following StrictMode.setVmPolicy statement after super.onCreate, as in:

```
@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    StrictMode.setVmPolicy(new StrictMode.VmPolicy.Builder()
        .detectAll()
        .penaltyLog()
        .penaltyDeath()
        .build());
```

2. Create a fresh Pixel emulator running API 30.

3. Run the app. The logcat should look like:

```
2021-06-19 11:02:59.017 2906-2906/? I/e.myapplication: Not late-enabling -Xcheck:jni (already on)

```

5. Describe what you expected to happen.

5a. Most serious bug. I expected that the app would run each time with roughly the same logcat output described in step 3. Instead we get a StrictMode policy violation that results in POLICY_I

5b. Second most serious bug. On the second app run, the logcat fills with greylist policy warnings and I would not expect that. The large collection of accessing hidden method greylist warning

I suspect that the bugs described here are related to components sometimes restarting, leading to longer cold start times in my production app. Here is the full logcat of a subsequent run of the

COMMENTS

 [hr...@gmail.com](#) <hr...@gmail.com> [#2](#)

An Empty Activity project produces a similar result.

pr...@google.com <pr...@google.com>

Assigned to pr...@google.com.

pr...@google.com <pr...@google.com> [#3](#)

Thank you for reporting this issue. For us to further investigate this issue, please provide the following additional information:

Please provide a sample project or apk to reproduce the issue. Also mention the steps to be followed for reproducing the issue with the given sample project or apk.

Android bug report (to be captured after reproducing the issue)

For steps to capture a bug report, please refer: <https://developer.android.com/studio/debug/bug-report#bugreportdevice>

Note: Please avoid uploading directly to the issue using attachments. Please upload to google drive and share the folder to android-bugreport@google.com, then share the link here.

hr...@gmail.com <hr...@gmail.com> [#4](#)

Here is the link to the project:

https://github.com/hrolfrc/bug_report_191503793.git

hr...@gmail.com <hr...@gmail.com> [#5](#)

The steps to be followed for reproducing the issue with the sample app were given in steps 2, 3, and 4 in the initial reporting. Please reread what I wrote.

pr...@google.com <pr...@google.com> [#6](#)

We've shared this with our product and engineering teams and will continue to provide updates as more information becomes available.

ba...@google.com <ba...@google.com>

Reassigned to ba...@google.com.

vi...@google.com <vi...@google.com>

Reassigned to vi...@google.com.

eq...@gmail.com <eq...@gmail.com> [#7](#)

I have the same issue on Pixel and Android 13:

```
2023-03-26 23:53:15.552 18129-18143 StrictMode          org.equeim.spacer      D StrictMode policy violation: android.os.strictmode.LeakedCl
    at android.os.StrictMode$AndroidCloseGuardReporter.re
    at dalvik.system.CloseGuard.warnIfOpen(CloseGuard.jav
    at sun.nio.fs.UnixSecureDirectoryStream.finalize(Uni:
    at java.lang.Daemons$FinalizerDaemon.doFinalize(Daem
    at java.lang.Daemons$FinalizerDaemon.runInternal(Daer
    at java.lang.Daemons$Daemon.run(Daemons.java:140)
    at java.lang.Thread.run(Thread.java:1012)
```

Setting breakpoint reveals that UnixSecureDirectoryStream refers to `/data/user/0/org.equeim.spacer/code_cache/startup_agents` directory.
