*Reassigned to ku...@google.com.*

Not sure about all the issues, but from the provided info in comment#1, it does point to this issue b/197383626:

the module dependency collection isn't handling cycles in the graph, thus there's infinite loop when traversing (com.intellij.util.containers.TreeTraversal\$P1 [ 34/ 38%/ 952B]  
4.61GB 1 parent: com.intellij.util.containers.TreeTraversal\$P1 [ 33/ 37%/ 924B] 4.61GB 1 parent: com.intellij.util.containers.TreeTraversal\$P1 [ 32/ 36%/ 89  
4.61GB 1 parent: ) and memory is used up eventually.

The fix for the above issue is included in AS 20203.1 patch2.

I would leave this bug open just in case there's other issues not addressed. Please let me know, thanks!
