Edit

 DESCRIPTION

e4...@gmail.com created issue [#1](#)

May 7, 2016 12:26AM

Version: Android N (Prerelease)

Issue: When listening to Google Music using a bluetooth headset the next song in the list continues playing but no sound comes out. Just pressing rewind fixes the issue. Issue does not show up on a wired headset.

Problem does not occur on Youtube or Soundcloud

Status: New

Hi,

Can you provide the below requested information to better understand the issue:

Android build

Which Android build are you using? (e.g. KVT49L)

Device used

Which device did you use to reproduce this issue?

Frequency

How frequently does this issue occur? (e.g 100% of the time, 10% of the time)

logcat output

See <http://developer.android.com/tools/help/logcat.html>. Copy and paste relevant sections of the logcat output into this issue.

Android bug report:

After reproducing the issue, navigate to developer settings, ensure 'USB debugging' is enabled, then enable 'Bug report shortcut'. To take bug report, hold the power button and select the 'Take bug report' option.

Note: Please upload the files to google drive and share the folder to android-bugreport@google.com, then share the link here.

dn...@google.com <dn...@google.com> [#4](#)

May 18, 2016 09:34PM

Marked as fixed, reassigned to dn...@google.com.

We were able to reproduce the issue on the public N Developer Preview 2 build. However, the issue is not reproducible in our internal latest development build (which is ahead of the public release).

e4...@gmail.com <e4...@gmail.com> [#5](#)

May 18, 2016 09:38PM

Thank you very much. That is good to know. I eagerly await the next beta

dn...@google.com <dn...@google.com> [#6](#)

May 24, 2016 08:26PM

Issue is fixed in N preview 3 build, NPD35K.
