STATUS UPDATE No update yet. Edit

DESCRIPTION sh...@gmail.com created issue #1 Jan 24, 2015 12:28AM

This crash occurred twice on different devices:

Nexus 5, KitKat 4.4.4
Nexus 4, JellyBean 4.3

Unfortunately I don't have steps to reproduce.

java.lang.RuntimeException: InputChannel is not initialized.
at android.view.InputEventReceiver.nativelnit (Unknown source)
at android.view.InputEventReceiver.<init> (InputEventReceiver.java:70)

I have seen the same problem on:
Samsung Galaxy Tab 3, Jelly Bean 4.2.2

ph...@gmail.com <ph...@gmail.com> #5 May 4, 2016 07:36AM
the same issue:
sm_g900v,android5.0

mi...@google.com <mi...@google.com> #6 May 4, 2016 11:40PM

From the first crash in the SO post:

> 05-29 12:11:36.897: E/WindowManager(2947): java.lang.RuntimeException: Could not open input channel pair. status=-24
-24 is EMFILE, meaning the application had too many files open. This is almost certainly an app bug, not a platform one.

Same from the third crash in the SO post:

> 05-30 14:11:59.465: E/WindowManager(2262): java.lang.RuntimeException: Could not open input channel pair. status=-24

The second crash in the SO post is different:

> 05-29 16:13:47.455: E/InputStream-JNI(7490): Error 9 dup channel fd -2147483647.

Error 9 is EBADF, which makes sense because that doesn't look at all like a valid fd. The number is interesting because it's equal to -INT_MAX (-2³¹ - 1). Nothing in either of the code paths uses INT_MAX as a sentinel value (as far as I can see), so this is either due to a Samsung specific change, something else is scribbling in memory, or we're reading from uninitialized memory somewhere. Without a full bugreport from the device, it's basically impossible to tell.

If you'd like to help debug this issue, feel free to either attach or send me a bugreport taken immediately after it happens. At the very least, I need the system logs up to the crash to start debugging further. This kind of crash isn't something I've seen happen and right now we have no repro steps.

in...@gmail.com <in...@gmail.com> [#7](#)

Jul 25, 2016 05:50PM

Caused by: java.lang.RuntimeException: InputChannel is not initialized.
at android.view.InputEventReceiver.nativeInit(Native Method)
at android.view.InputEventReceiver.<init>(InputEventReceiver.java:70)
at android.view.ViewRootImpl\$WindowInputEventReceiver.<init>(ViewRootImpl.java:6592)
at android.view.ViewRootImpl.setView(ViewRootImpl.java:809)
at android.view.WindowManagerGlobal.addView(WindowManagerGlobal.java:278)
at android.view.WindowManagerImpl.addView(WindowManagerImpl.java:69)
at android.app.Dialog.show(Dialog.java:289)

I met this issue when app begins to launch activity, and call the method of show , then the app crashed.

android os version: 4.4.2 , samsung_sm-g9008v

Here is what i have met, refer to [comment #6](#), key log as follow:
 05-22 06:55:05.452 8363 8363 E InputChannel-JNI: Error 9 dup channel fd 80.
 I think 80 is a valid filedescriptor, why would this happen?

Jun 15, 2017 12:27AM

app showing this on crashlytics's report.

but 7 out of the 9 instances the "Ram free" shows 0%, not seeing this 0% on most of the other instances reported there. not sure if it is related.

Same here in a Xamarin app:

```
Exception java.lang.RuntimeException: InputChannel is not initialized.
android.view.InputEventReceiver.nativeInit (InputEventReceiver.java)
android.view.InputEventReceiver.<init> (InputEventReceiver.java:70)
android.view.ViewRootImpl$WindowInputEventReceiver.<init> (ViewRootImpl.java:6057)
android.view.ViewRootImpl.setView (ViewRootImpl.java:637)
android.view.WindowManagerGlobal.addView (WindowManagerGlobal.java:313)
android.view.WindowManagerImpl.addView (WindowManagerImpl.java:86)
android.app.ActivityThread.handleResumeActivity (ActivityThread.java:3176)
android.app.ActivityThread.handleLaunchActivity (ActivityThread.java:2488)
android.app.ActivityThread.access$900 (ActivityThread.java:153)
android.app.ActivityThread$H.handleMessage (ActivityThread.java:1349)
android.os.Handler.dispatchMessage (Handler.java:102)
android.os.Looper.loop (Looper.java:148)
android.app.ActivityThread.main (ActivityThread.java:5442)
```

```
java.lang.reflect.Method.invoke (Method.java)
com.android.internal.os.ZygoteInit$MethodAndArgsCaller.run (ZygoteInit.java:738)
com.android.internal.os.ZygoteInit.main (ZygoteInit.java:628)
```

Happened several times in a row with a Xiaomi MI MAX with Android 6.0.1.

Guys, if you're gonna attach stack traces, get full bug reports. Settings -> Developer Options -> Generate Bug Report.
The googler requested full system logs, so stack traces alone probably aren't going to help.
