Android Version: Android N Preview 4 (NPD56N)  
Phone : Nexus 5X

Hi, Our apk has loaded other dex.  
when I use the dex's function, crash happened.  
JNI ERROR happened when loadclass "ntsvn.gm"(confused) which is in the dex.  
Our apk in Android5.0 and Android6.0 is no problem , but in Android N preview4 have crashed.  
we did not use any So library.

Here is logcat, I think this is Android N's bug:

Hi,

Request you to provide below information

please attach your sample android project which reproduces the issue, zip it and share(just to avoid the confusion between your sample code and the one we create to replicate the issue,sample code is requested here).

Explain the steps to reproduce the issue with your apk. Provide all necessary information to reproduce the issue.

Also share android bug report:

After reproducing the issue, navigate to developer settings, ensure 'USB debugging' is enabled, then enable 'Bug report shortcut'. To take bug report, hold the power button and select the 'Take bug report' option.

Note: Please upload the attachments to google drive and share the folder to [android-bugreport@google.com](mailto:android-bugreport@google.com), then share the link here.

When try to install the app, showing some pop up as shown in the attached screenshot.

After click on ok, installation is failing due to Failure [INSTALL\_FAILED\_VERIFICATION\_FAILURE].

Please provide the proper one

If you install apk which is not download by Google Play, this window always pop up.  
You need to install a local apk file.  
The method is not a recommended way.  
So you need ignore the warning, please click "Install anyway(unsafe)", thank you.

If you click on ok, will get error message Failure [INSTALL\_FAILED\_VERIFICATION\_FAILURE].  
You need to click on "Install anyway(unsafe)" like shown in the attached screenshot.  
  
In my phone, I click on "Install anyway(unsafe)" and can installed successfully.

Marked as fixed, reassigned to am...@google.com.

The issue is observed on N DP4. But not on our internal latest builds. Instead, it's showing some toast message. Attached the screenshot for reference

Thank you ,  
That's OK, if release version is no problem.  
The toast just remind that no sim card, it has nothing to do with this crash.
