 DESCRIPTION

su...@gmail.com created issue [#1](#)

Jun 12, 2020 06:00AM 

IMPORTANT: Please read <https://developer.android.com/studio/report-bugs.html> carefully and supply all required information.

Studio Build: Version of Gradle Plugin: 3.6.3 Version of Gradle: 6.1-rc-1 Version of Java: VERSION_1_8 OS: Android Version 6 Marshmallow

Steps to Reproduce:

1. Late-enabling -Xcheck:jni

2. The ClassLoaderContext is a special shared library.

3. Installing application

4. VM has multidex support, MultiDex support library is disabled.

Thanks for the feedback. To help us troubleshoot this issue further, we will need more information. Please share detailed reproduction steps and as much as possible of the following information when it applies if you haven't already:

1. Android Studio version and OS type and version

2. Screenshots or videos of the issue

3. idea.log file (select Help > Show Log in Finder / Explorer)

4. Thread dumps if the issue is a freezing or non-responding UI.

For more information on what's needed and how to obtain this information please read the guide at <https://developer.android.com/studio/report-bugs#studio-bugs>

Status: Won't Fix (Intended Behavior)

This is not as issue, it is logging from the library (I/MultiDex: VM has multidex support, MultiDex support library is disabled.) specifying that the VM already has multidex support and that the library is a no-op.

In case this is causing runtime issues, please share more information and I'll reopen the issue.
