### so...@google.com <so...@google.com><u>#4</u>

Although the exception is at the same place with a similar stack trace, I think this is a different problem as it applies to the root module.

- 1. Do you happen to have any specific settings in settings. gradle to change the locations of any Gradle project roots?
- 2. Do you have any symlinks in paths to your project or between modules in your project?

# so...@google.com <so...@google.com><u>#5</u>

If anyone else still hits this please share your idea. log files if possible, and if there are any specific configuration settings that you find important let us know too. Thank you!

I have the same problem. See my idea. log file below. I discovered a workaround - instead of "Whole Project" select "Custom Scope" and choose "All Places" in the combobox.

In my root settings.gradle.kts I only enable the Gradle Version Catalogs feature preview and include modules. In buildSrc/settings.gradle.kts I also enable the feature preview and include modules. In buildSrc/settings.gradle.kts I also enable the feature preview and include modules.

```

Note that the assertion seems to have been removed, but I'm not sure whether it showed a problem or not.
ce...@gmail.com <ce...@gmail.com><u>#8</u>
Note that after upgrading AS to Dolphin the code inspection seems to work correctly. Meanwhile I also bumped Gradle Build Tools to 7.3.0 and Kotlin to 1.7, not sure if any of these changes I

#### at...@gmail.com <at...@gmail.com>#10

I am also stuck at lack of basic code inspection, but only in Framingo. Interestingly, not on Electric Eel. The config settings on clang seems the same (maybe shared?)

The significant difference I see in those versions is that Framingo reports this at startup:

Android Studio reports "Failed to initialize server: com.jetbrains.cidr.lang.daemon.clang.clangd.lsp.server.ClangServerAccessorImpl\$FatalErrorException: Version of clion-clangd is 70, but e

 $I \ don't \ see \ a \ lot \ of \ content \ diffs \ between \ those \ versions \ at \ plugins-c-clangd\ , \ meaning \ that \ any \ expected \ clion-clang \ version \ bump \ did \ not \ seem \ to \ happen: \ description \ desc$ 

\$ diff -ur /home/atsushi/.local/share/JetBrains/Toolbox/apps/AndroidStudio/ch-1/221.6008.13.2211.9113387/plugins/c-clangd /home/atsushi/.local/share/JetBrains/Toolbox/apps/AndroidStudio/ch-1/221.6008.13.2211.9113387/plugins/c-clangd/lib/c-clangd.jar and /home/atsushi/.local/share/JetBrains/Toolbox/apps/AndroidStudio/ch-1/221.6008.13.2211.9113387/plugins/c-clangd/lib/LICENSE.txt is a regular file whil

This is regardless of whether I enable "Use external Clang-Tidy instead of the built-in one" on the clang settings or not.

## so...@google.com <so...@google.com><u>#11</u>

Assigned to an...@google.com.

The assertion has been remove. I don't know if it was intended as a fix and whether duplicate registration shows a problem or not. I suspect it might still be broken but now in a different way.

Please re-triage/re-assign.
so@google.com <so@google.com> #13         Reassigned to so@google.com.         Context: ag/ld59e245296b0df0d785882e897b8d714e0246005</so@google.com>
so@google.com <so@google.com><u>#14</u>  Re comment #6, please file a new bug as it is unlikely related to the root cause of this issue.</so@google.com>
so@google.com <so@google.com><u>#15</u>  Re comment #9, I moved to a separate issue https://issuetracker.google.com/253708258</so@google.com>
so@google.com <so@google.com><u>#16</u>  From the original issue the only remaining problem is a change introduced in ag/ld59e245296b0df0d785882e897b8d714e0246005. We need to reinstate the assertion.</so@google.com>
so@google.com <so@google.com><u>#17</u>  I'll file a new issue to track this.</so@google.com>
so@google.com <so@google.com><u>#18</u>  Marked as fixed.  If anyone has similar problems please open new issues.</so@google.com>
tn@google.com <tn@google.com> #19  (The crash mentioned in comment #9 is tracked in 253708258 and will be fixed shortly.)</tn@google.com>
