IMPORTANT: Please read https://developer.android.com/studio/report-bugs.html carefully and supply all required information.

1. Create new project

File -> New -> New Project -> Native C++

Accept all the defaults

2. Build the project and debug on a connected phone running Android 11 (Pixel 5 or ASUS ROG 5)

App stuck on phone waiting for debugger.

Logcat shows multiple warnings about accessing hidden methods from java/lang/Thread and other Java classes, including blacklisted, denied

2021-08-05 14:56:11.179 20409-20409/? W/e.myapplicatio: Accessing hidden method Ljava/lang/Thread;-><clinit>()V (blacklist, linking, denied) Debug window says the process finished with exit code 0.

The same happens when trying to debug on a Nexus 5X API 28 emulator.

Running the app without the debugger seems fine: the app starts without a problem.

I updated the NDK to 22.1.7171670 and that showed the same behaviour.

Here's the logcat output:

Can you also try with the Java-only debugger? (Run Configuration > Debugger > type)
