📄 **DESCRIPTION** ma...@gmail.com created issue #1   Jun 9, 2020 07:01AM   ⋮

Build: AI-193.6911.18.40.6514223, 202005201507,

AI-193.6911.18.40.6514223, JRE 1.8.0_242-release-1644-b01x64 JetBrains s.r.o, OS Windows 10(amd64) v10.0 , screens 1440x900

AS: 4.0; Kotlin plugin: 1.3.72-release-Studio4.0-1; Android Gradle Plugin: 4.0.0; Gradle: 6.1.1; NDK: from local.properties: (not specified), latest from SDK: (not found);
LLDB: pinned revision 3.1 not found, latest from SDK: (package not found); CMake: from local.properties: (not specified), latest from SDK: (not found), from PATH: (not found)Source: user_sentiment_feedback

IMPORTANT: Please read https://developer.android.com/studio/report-bugs.html carefully and supply all required information.
PROBLEM DESCRIPTION: whenever gradle syncs either automatically at startup or manually after a while the error"Gradle sync failed: Tag mismatch!
                  Consult IDE log for more details (Help | Show Log) "
pops up

Thanks for the feedback. To help us troubleshoot this issue further, we will need more information. Please share detailed reproduction steps and as much as possible of the following information when it applies:

1. Gradle and Android Plugin Version (File -> Project Structure -> Project)
2. Build logs
3. idea.log file if the issue occurs from Android Studio (select Help > Show Log in Finder / Explorer)
4. Gradle profile if it is a performance issue as described in https://developer.android.com/studio/build/optimize-your-build#profile

For more information on what's needed and how to obtain this information please read the guide at https://developer.android.com/studio/report-bugs#build-bugs

○ **ma...@gmail.com** <ma...@gmail.com> #3   Jun 10, 2020 08:16PM   ⋮

1. Gradle version:6.1.1
    Android Pugin version: 4.0.0
2. Build logs:

1:50 PM Gradle sync started

1:54 PM Gradle sync failed: Tag mismatch!
                Consult IDE log for more details (Help | Show Log) (3 m 48 s 293 ms)

1:56 PM Gradle sync started

2:04 PM Gradle sync failed: Tag mismatch!
                Consult IDE log for more details (Help | Show Log) (8 m 26 s 915 ms)

It means that somehow the SSL layer is failing to download the SDK over HTTPS. Are you using a proxy or something that could be interfering with HTTPS?

sorry for the late reply.
im not using a proxy or anything that in my knowledge would interfere with HTTPS

Can you check which JDK is used to run Gradle? It's under `Project Structure` in the `SDK Location` tab.

Status: Won't Fix (Not Reproducible)

Our team had requested additional information for this issue which was not provided within 30 days. Unfortunately there is not enough information for us to proceed and this issue is now closed.

In the future, if you encounter this or any other issue, please read https://developer.android.com/studio/report-bugs.html and file a new bug report with all the required information. This will help ensure the team can correctly triage, reproduce, and resolve your issue.

Thank you!
