Reassigned to wa...@gmail.com.

Hi, the latest version is 1.3.0-alpha06. Can you please try the latest version and let us know if it still happens?

wa...@gmail.com <wa...@gmail.com> #3

I have try the version: 1.3.0-alpha06，Crash immediately when invoke `bindToLifecycle()` ,Here is the code.

```
        // ResolutionSelector
        val resolutionSelector = ResolutionSelector.Builder()
            .setHighResolutionEnabledFlag(ResolutionSelector.HIGH_RESOLUTION_FLAG_OFF)
            .setAspectRatioStrategy(AspectRatioStrategy.RATIO_16_9_FALLBACK_AUTO_STRATEGY)
            .setResolutionStrategy(ResolutionStrategy.HIGHEST_AVAILABLE_STRATEGY)
            .build()

        // 拍摄模式 可以选择是否禁用高分辨率
        // CAPTURE_MODE_MINIMIZE_LATENCY: 缩短图片拍摄的延迟时间
        // CAPTURE_MODE_MAXIMIZE_QUALITY: 提高图片拍摄的图片质量
        imageCapture = ImageCapture.Builder()
            .setTargetRotation(Surface.ROTATION_0)
            .setCaptureMode(ImageCapture.CAPTURE_MODE_MINIMIZE_LATENCY)
            .setFlashMode(ImageCapture.FLASH_MODE_AUTO)
            .setResolutionSelector(resolutionSelector)
            .build()

        val tmpCamera = requireCameraProvider.bindToLifecycle(
            this@OcrFragment,
            cameraSelector,
            preview,
            imageCapture
        )
```

But, when I commit `imageCapture`, the `preview` can work normally!

```
        val tmpCamera = requireCameraProvider.bindToLifecycle(
            this@OcrFragment,
            cameraSelector,
            preview,
    //        imageCapture
         )
```

And Crash immediately when add `imageCapture`.

```
        val tmpCamera = requireCameraProvider.bindToLifecycle(
            this@OcrFragment,
            cameraSelector,
            preview,
            imageCapture
         )
```

Reassigned to ca...@google.com.

Thanks! We will take a look and update the status here.

er...@google.com <er...@google.com> #6

Which device? Which OS?

CamX is part of the Qualcomm subsystem and not referencing the CameraX Library.

Hi Wanghuaiyv,

Can you tell us what device and what android version ?

Also can you reproduce it on other android devices ?
