📄 **DESCRIPTION** al...@google.com created issue #1   Aug 18, 2021 03:52AM   ⋮

The manifest for `androidx-main` and the internal branch have:

```
<project
  path="prebuilts/fullsdk-linux/cmake"
  name="platform/prebuilts/cmake/linux-x86"
  revision="de5fa1c66d3bdcbf2bbc62d2504ec6b0b0fb74e1"
  groups="notdefault,platform-linux"
  clone-depth="1" />
```

Which is likely out-of-date. Fred suggested we may need to update NDK before we're able to update `cmake`.

Reassigned to fs...@google.com.

○ **fs...@google.com** <fs...@google.com> #2   Sep 15, 2021 12:26AM   ⋮

To update the NDK to the latest version (23) we need to create a new repo for the latest Darwin version
(`toolchain/prebuilts/ndk-darwin/r23`). The linux repo already exists (`toolchain/prebuilts/ndk/r23/`). After that we
should be able to unpin the cmake version.

Creating the new repo requires an architecture review. I'll send an email request to kick that off.

+danalbert to confirm that this is ok to add in this location (with this naming convention too).

○ **da...@google.com** <da...@google.com> #4   Sep 15, 2021 07:46AM   ⋮

Matches the naming scheme that was used for r21 so seems fine.

    Update CMake version to 3.18.1

    This change is required for updating the version of the NDK we depend on (21 -> 23) as well as the version of CMake. The
CMake prebuilt no longer comes bundled with Ninja so both those executables have been linked to native-build-tools/bin.

   Update NDK / CMake prebuilts

   Upgrades NDK version from 21 to 23, unpins CMake from 3.10.2 and set to master (3.18.1). Adds dependency on Ninja prebuilt which was previously bundled with CMake 3.10.2.
