👥 **STATUS UPDATE** No update yet.   Edit

📄 **DESCRIPTION** ni...@gmail.com created issue #1   Jul 19, 2017 05:58PM   ⋮

I cannot pinpoint at what point this has started but,I believe it is after when I started using AS 3 Canary builds with tools 26.0.0

Project's targetSdkVersion = 25,   ext.compileSdkVersion = 26,   ext.buildToolsVersion = "26.0.0"

ONLY happens with Android 5.1.1 and (probably) with AOSP or CM Custom ROMS

On some phones phone reboots as soon as installation of the apk started with following trace

```
07-18 16:53:42.189 10482-10482/? W/InstallAppProgress: Replacing package:com.xxxx

```

I wonder if it is related to zip align etc during the packaging
