📄 **DESCRIPTION** li...@gmail.com created issue #1

This form is for reporting platform issues and requests related to the Android 12 Developer Preview /Beta only. Please only report issues that are regressions from the behavior in Android 11. For

If the issue is caused by an app and not a platform issue, we will do our best to route the issue to the app developer. However, note that it is up to the app developer to actually address reported i

Before logging your issue, check to see whether it is a known issue described in the current release notes at:

https://developer.android.com/about/versions/12/release-notes.html

or has already been reported at:

bit.ly/3e0DanD

If the issue has already been reported, you can "star" or comment on the existing report if it corresponds to the issue you are seeing.

To expedite resolution of your issue, please provide as much relevant and specific information as possible. This will probably require some work from you. Most reports should include at least th

```
 * Are you an Android developer?" (Y/N)
```

Y

```
 * Which Android Developer Preview build are you using? See Settings > About phone > Build number (for example RPP1.200123.000).
```

SPB1.210331.013

```
 * Is this a regression from Android 11 to 12?
```

Yes

```
 * What device are you using? (for example, Pixel 4 XL)
```

Pixel 4a

```
 * What are the steps to reproduce the problem? (Please provide the minimal reproducible test case.)
```

Try to enter immersive full screen

```
 * Issue Category e.g. Framework (platform), NDK (platform), Hardware (CPU, GPU, Sensor, Camera), ART (platform), Runtime Permissions etc
```

UI

```
 * What was the expected result?
```

Immersive full screen would be entered.

```
 * Can you provide the API document where this expected behavior is explained?
```

https://developer.android.com/training/system-ui/immersive#java

```
 * What was the actual result?
```

UI elements such as toolbar still appeared after immersive mode.

```
 * Relevant logcat output.
```

```
2021-05-23 21:11:53.409 11115-11115/? W/SessionManager: SessionManager.beginSession():53 Try to begin an already begun session [INPUT_SESSION], end it first
2021-05-23 21:11:53.847 1988-5888/? W/InputManager-JNI: Input channel object 'd28b308 PopupWindow:4082360 (client)' was disposed without first being removed
2021-05-23 21:11:58.782 12503-12611/? W/A: Queue length for executor EventBus is now 11. Perhaps some tasks are too long, or the pool is too small.

Hello ,
Thank you for your support. As the Android S Beta2 builds are now publicly available, we request you to please check this issue on SPB2.210513.007. If the issue still exists, share us the late

---

◯ **li...@gmail.com** <li...@gmail.com> #7

Thank you. I took a quick look under Beta2 and the problem almost got resolved except some UI elements still did not disappear as expected. I will take a closer look when I get a chance late

---

◯ **ve...@google.com** <ve...@google.com> #8

Status: Won't Fix (Obsolete)

Thank you for response.

As per comment#7, closing this issue.
