Appears to be caused by a pre-set LD_LIBRARY_PATH.

The following appears to fix the issue:

$ unset LD_LIBRARY_PATH

Hi

Thank you for your report

The comment #2 is very interesting.

Could you please let us know what was in the $LD\_LIBRARY\_PATH$ before you unset it ?

So far we have not been able to reproduce the problem

Thanks

Status: Won't Fix (Not Reproducible)

Our team had requested additional information for this issue which was not provided within 30 days. Unfortunately there is not enough information for us to proceed and this issue is now closed.

In the future, if you encounter this or any other issue, please read https://developer.android.com/studio/report-bugs.html and file a new bug report with all the required information. This will help ensure the team can correctly triage, reproduce, and resolve your issue.

Thank you!
